

ToughSonic® 50 Thread Mount Level Sensor

Windows PC Setup, Waterproof, Multiple Outputs

TSPC-25P Series

TSPC sensors and SenixVIEW software put the power of ultrasonics in your hands. Quickly adjust, optimize, save and clone your setups without calibration!

These sensors are housed in a single small potted enclosure for environmental durability and long life. They mount at a distance from a liquid or solid material and measure distance to the surface. Sensor outputs respond to that measured distance.

Applications exist in many industries, and include pump control, bulk inventory, high/low level alarms, river level for flood detection and much more.

Non-Contact Ultrasonic Distance & Level Measurement

Features

Distance Measurements

- Long range, short dead band
- Continuous and point level
- Water or non-caustic materials
- Adjustable by computer (PC) software, locally or remotely
- Narrow beam with adjustments to optimize performance

Packaging & Performance

- Survives submersion
- Temperature compensation for improved accuracy
- Short & overload protected I/O
- Adjustable sensitivity
- Rear status indicators (3)

Free Functionality using adjustable interface features like switch hysteresis and time delays to build complete solutions such as pump or material flow controllers. Save cost by eliminating PLCs, delay circuits and time delay relays!

Up to 50-ft. (15.2 m) maximum range in IP68 rated 2-1/2" NPT threaded PVC housing

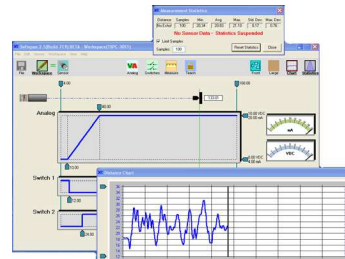

SenixVIEW PC Software included!

PC Setup Power!

Use SenixVIEW software (see separate data sheet) to select and adjust all interfaces, timing parameters, filters and modes. Then view, analyze or log data to optimize your application.

Flexible configuration means fewer parts to stock and quick duplication! Application setups can be stored on your PC and later recalled. Using a single inventory part you can quickly clone replacement sensors for any number of applications with re-calibration!

Multiple Outputs

In addition to the model's RS-232 or RS-485 serial data interface there are five simultaneous outputs. All have SenixVIEW configurable features including ranges, target responses and time delays.

Analog Outputs (3)

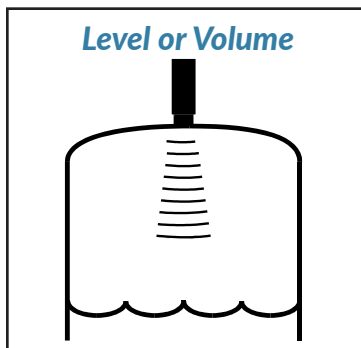

These include voltage (0-10 VDC) and two current loops (4-20 mA sinking and sourcing).

The analog slope can increase or decrease value with distance. The analog output limits can be set any distance, and have user-selected voltage/current values.

Switches (2)

Two switches are SenixVIEW configurable as either "PNP" or "NPN" type (sourcing or sinking). Each has adjustable set point, hysteresis, window, initial conditions, ON delay, OFF delay and loss of target response for ultimate flexibility.
